

Gas ranges - top

The Electrolux 700-Line of cooking equipment is designed to meet the requirements of cafés, restaurants and hotels. The flexibility of the modular design, with freestanding units and tops that can be supported by a range of bases or bridged between freestanding units, and the choice of 115 different units means that an installation can be tailored to precisely meet the needs of the caterer. Gas ranges are available in a choice of four models, top units with either two or four burners, or freestanding units with four or six burners above an ambient storage cupboard. The models detailed on this sheet are top only units in half or full module. Model 7BTTG2D is a town-gas versions.

168000

EASY TO INSTALL

- Service connections to top units are made via a duct to the rear.

EASY TO CLEAN

- Constructed from AISI 304 stainless steel with a pressed, one piece top with sealed burners fitted with removable caps and rings to meet the highest hygiene standards.
- Stainless steel control panel with splash protection to control knob entry points.
- Optional U-gulley between units to eliminate dirt traps.

EASY TO USE

- Two sizes of burners to suit varying pan sizes and cooking requirements from rapid boiling to a gentle simmer.
- Alternate large/small burner layout for maximum usable cooking area.
- Electric ignition, that can be operated by one hand, with flame failure control.
- Inset controls that cannot be accidentally knocked.

EASY TO MAINTAIN

- Access to all components from the front.
- IPX4 water protection
- Meets the requirements of CE for safety.

EASY ON THE ENVIRONMENT

- 98% recyclable by weight.
- CFC free packaging.
